

Beauclarine Thomas

State and Local Government Relations Lead
Anthropic

Beauclarine Thomas leads Anthropic's government affairs efforts in the Northeast. In this role, she educates lawmakers and communities about the benefits of AI and Anthropic's commitment to developing steerable, interpretable, and safe AI systems — with the

ultimate goal of ensuring that transformative AI has a positive impact on humanity. Her work focuses on legislation development and advocating for safer, more transparent AI systems.

Previously, Beauclarine served as Meta's state policy lead for the Mid-Atlantic region, shaping policy on social media, technology, and economic development. She negotiated key amendments to New York's RAISE Act and to Connecticut SB 5, landmark AI safety bills.

She brings experience across government and the nonprofit sector. Based in Brooklyn, she holds a BA in International Studies from DePaul University and an MPP from the University of Denver.
